PROFILE

Data Analyst proficient in Python, Excel, SQL, Tableau, and PowerPoint. With 5+ years of food service and management experience, I am now leveraging my problem-solving and analytical skills with everyday needs of a business.

PROJECT EXPERIENCE

King County Housing Prices

- Discover variables that influence the housing market in King County, Washington, and create a predictive model to accurately predict housing prices.
- This project applies exploratory visual analysis, geospatial analysis, regression analysis, unsupervised machine learning, time series analysis in Python, and data visualization through Tableau.

Instacart, Online Grocery

- Advise a targeted marketing strategy based on customer data and purchasing habits.
- This project applies data wrangling & cleaning, consistency checks, merging dataframes, grouping and aggregating data, and data visualization in Python.

Rockbuster Stealth, Video Rental

- Using data from video rental company to create a launch strategy for a new online video service.
- This project applies database querying, filtering & cleaning data, joining tables, performing subqueries, and common table expressions in PostgreSQL.
